

Biography

Deepthi Edirisinghe is a Medical Laboratory Technologist at University Hospital of Kotelawala Defence University, Sri Lanka. She works in the Molecular Laboratory for COVID-19 diagnosing. She is a graduate with a bachelor's degree in Medical Laboratory Sciences (Hons) and is currently reading for her Masters degree in Molecular Pathology at the Human Genetics Unit of University of Colombo Sri Lanka. She is interested in the study of mutations in the novel genes associated with diseases of less interest in the society but occurs in the majority of the population. The designing and implementation of diagnostic assays for such mutant genes that could be carried out with the minimum resources available is her aim.
